Hayk Mirzakhanyan

(747) 256-9055 | hmirzakh0001@gmail.com | **LinkedIn**

Computer science student graduating May 2027 with a 3.8 GPA and team project experience in embedded systems and web applications. Eager to expand technical skills, with a record of learning new tools quickly and contributing under short deadlines.

EDUCATION

California State University, Northridge | B.S. Computer Science
Expected May 2027 | GPA: 3.8
Dean's Honor List: Spring 2025

Los Angeles Pierce College | Associate Degrees | January 2025
STEM, Social and Behavioral Sciences, Arts and Humanities | GPA: 3.76
President's Honor List: Fall 2024
Dean's Honor List: Fall 2022, Spring 2024, Fall 2024

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, HTML, CSS
Tools and platforms: Git, GitHub, VS Code, Visual Studio, Microsoft Office Suite, Google Workspace, AutoMod, Excel

PROJECTS

RideAlert Motorcycle Crash Detection | C++, Arduino Uno | Team project

- Built a prototype that detects excessive motorcycle tilt and sends a smartphone alert through Bluetooth to flag a possible crash.
- Integrated a BNO055 orientation sensor; debugged calibration and tested tilt thresholds to refine detection behavior.

Sign Language Letter Recognition | Python, Node.js | Two-day hackathon

- Collaborated on a prototype that recognizes signed letters and converts them into text using AI-assisted processing.
- Contributed to the Python component and worked with teammates on application flow, learning unfamiliar tools within the hackathon deadline.

Habit Builder for ADHD Users | JavaScript, Node.js | Team project

- Helped develop a habit-tracking prototype for users with ADHD during a two-day team project.
- Collaborated on backend logic and a responsive interface to support a straightforward habit-tracking experience.

AI Healthcare Workload Optimization | JavaScript, HTML | Two-day hackathon

- Helped build a web prototype to analyze employee workloads and breaks and suggest task redistribution, addressing worker fatigue concerns.
- Used AI tools as part of the required development process and collaborated on core functionality under a two-day deadline.

Class Website Projects | HTML, CSS

- Built multi-page website in class. Planned next project, a website for a local business.

ADDITIONAL LEARNING

- Learned a new 3D modeling application within one week to prepare for a job requirement; independently explored manufacturing and logistics simulation with AutoMod.
